	(Record of item checked above)	
TO: Tom Gallagher, NEIC	FROM: David Ullrich <i>DU</i>	DATE 3/21/83
		TIME PM
SUBJECT Reilly Tar and Chemical, St. Louis Park Minnesota (RCRA/CERCLA)		
SUMMARY OF COMMUNICATION		

I was returning Tom's call of earlier in the day. Tom said he had received a request from Gene Lucero for technical assistance at Reilly. Lucero had requested that NEIC perform a groundwater monitoring survey in the vicinity of the plant. Some groundwater work has been done already, but this study would be designed to see if the contamination has migrated to locations farther away from the site than previously tested. Tom wanted to make sure that this study was consistent with our wishes on the case.

I gave Tom a brief background on the case, and he said he was quite familiar with it. I also said that this was a very high priority. I added that it sounded as though this would be an appropriate thing as additional support before the litigation. I told him that I would check with Bob Leininger to make sure that this was consistent with his desires. It certainly seems to me to be the kind of thing that we want to do. I told Tom I would get back to him if there was any problem, otherwise he could assume that we agree the study should be conducted.

I talked with Bob Leininger on March 22, and he confirmed that the litigation team very much wants the study performed and that it should go ahead.
